Assignment of the shims for wooden windows

Profile	Shim item no.
Depending on the design and dimensions of the wooden profiles, or their Euro-groove, the following supports should preferably be used:	135011 135016 135017

Important:
- the frame and casement timbers must not exhibit any cracks
- if a casement or frame groove (Euro-groove) is present, a suitable shim must be used, if necessary, the groove may be glued in the fastening area with a filler piece.

Missing information and notes see:
Installation instructions Mat. no. 134433 (drawing no. 41314-9-0950)
